

Data Analytics (DA)

Module -1 - Excel

Excel Assignment 2 – Data Exploration

Dataset: Product Dataset

Attributes: Product ID, Product Name, Brand Name, Quantity, Category, Price

Tasks: 1. Handling Missing Values:

- Check for missing values in the 'Price' column. How would you handle products with missing price information?

Result: As checked the dataset, there is no missing values in the price column. If missing values are there, it can be handled through mean since this is numerical column

- If there are products with missing categories, propose a strategy to impute or deal with these missing values effectively.

Result: As checked the dataset, there is no missing values in the price column. If missing values are there, it can be handled through mode (highest frequency) since this is categorical value.

2. Correcting Inconsistent Data:

- Identify any inconsistent text formats present in the "Product Name" column.

Result: =Proper([@[Product Name]])

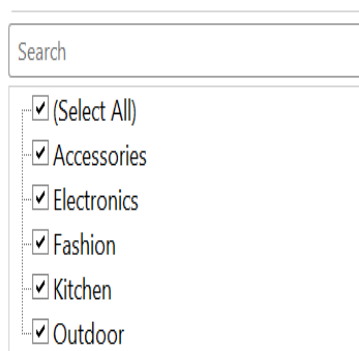

=TRIM([@[Product Name]])

- Identify any typos present in the "Category" column.

Result: There is no typos present in the "Category" column

- Use the find and replace function to standardize the text formats in the "ProductName" column and fix any typos or misspellings in the "Category" column.

Answer: Text Formats is already in proper and there is no typo error

Search

- ☒ (Select All)
- ☒ Accessories
- ☒ Electronics
- ☒ Fashion
- ☒ Kitchen
- ☒ Outdoor

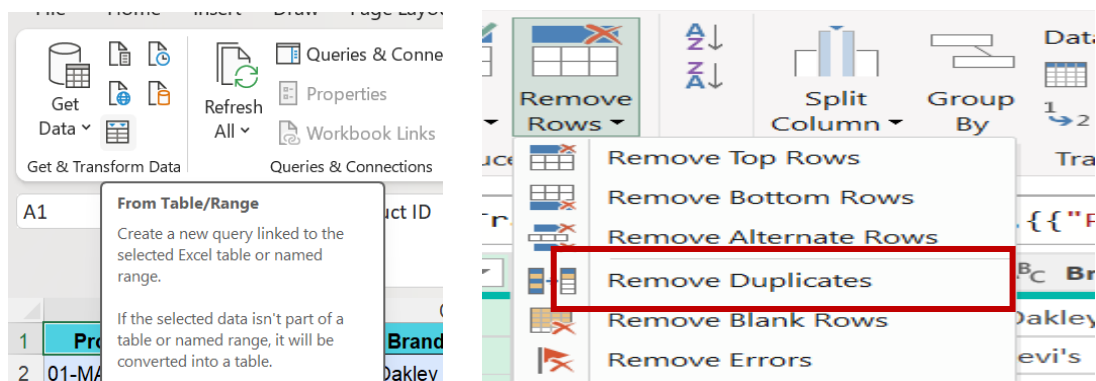

3. Removing Duplicates:

- Identify any duplicate rows within the dataset based on the entirety of each row, and remove them if any.

Result: Total 34 rows were found, in that 3 rows are duplicate.

Steps to remove duplicates:

Data → Transform data → Remove rows → Remove duplicates

4. Splitting and Merging Data:

- Split the "Product ID" column into two separate columns for "Manufacturing Date" and "Country Code". Remove unnecessary characters, if any.

Result:

Country Code can be split either in two ways

i) Flashfill

Go to Data ribbon → flashfill

Country Code
UK
CA
CA
US
UK
UK
CA
DE

ii) Text to columns → Fixed width

Manufacturing Date

Date is split from Product_Id column → Transform Data → Data Type → Date

Data Type: Date/Time	1 2 Repla
Decimal Number	
Currency	
Whole Number	
Percentage	
Date/Time	
Date	
Time	
Date/Time/Timezone

Text	
True/False	
Binary	

Manufacturing Date
01-03-2026
02-12-2026
03-06-2026
03-03-2026
05-09-2026
07-06-2026
07-03-2026
08-12-2026

- Merge the "Brand Name" and "Product Name" columns into one column named "Product Brand".

Result: =CONCATENATE([@[Brand Name]], " ", [@[Product Name]])

Product Brand
Oakley Sunglasses
Levi's Jeans
Ray-Ban Sunglasses
Keurig Coffee Maker
Apple Tablet
Sony Headphones
Zara Dress
Nespresso Coffee Maker
Panasonic Microwave
Casio Watch

5. Number Formatting:

- Format the data type of the "Price" column to a currency format.

	Conditional Fc
General	No specific format
Number	Price (\$)
Currency	Price (\$)

Price (\$)
150.00
50.00
130.00
130.00
500.00
200.00
60.00
120.00

- Format the "Manufacturing Date" column to display dates in the "DD-MM-YYYY " format.

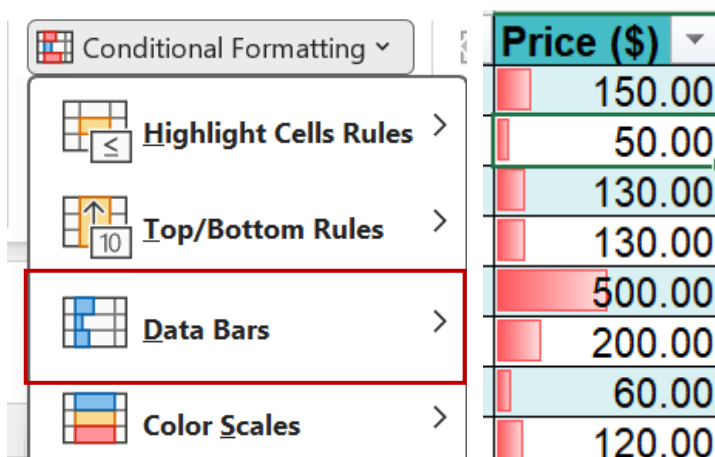

Date is split from Product_Id column → Transform Data → Data Type → Date

Manufacturing Date
01-03-2026
02-12-2026
03-06-2026
03-03-2026
05-09-2026
07-06-2026
07-03-2026
08-12-2026

6. Conditional Formatting:

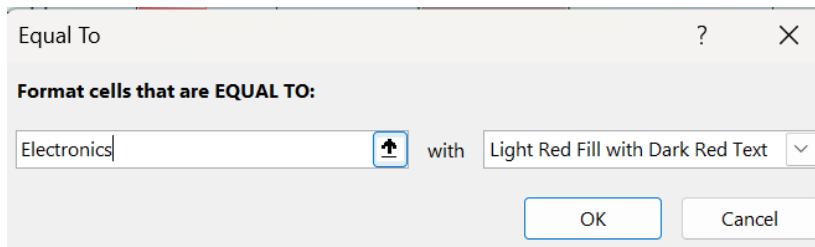

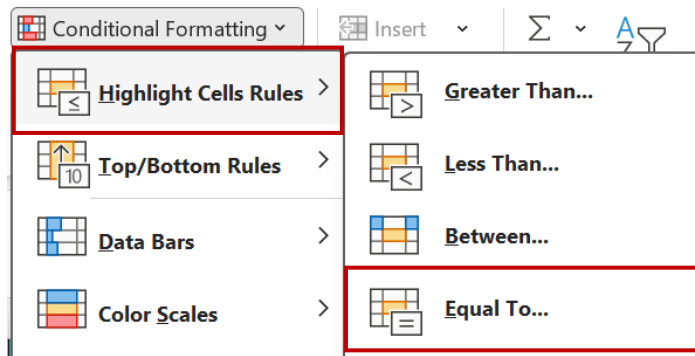

- Apply data bar or color scales conditional formatting in the "Price" column.

Result: Goto Home Ribbon → Conditional formatting → Data Bars → select the grid style option

- Create a custom rule for conditional formatting in the "Category" column to highlight cells where the category is "Electronics."

Result: Goto Home → Conditional formatting → Highlight cell Rules → Equal to → Type Electronics in the text box
